

XM Satellite has become a critical part of my day. The weather and traffic channels provide an easy, and beneficial way for me to quickly understand situations in my area. There is a great benefit by going to the channel in my area, and read the weather status without waiting for an update. And traffic updates are always current.

It saves me time, provides value and is a service along with the rest of XM radio I'm happy to pay for.

Please allow XM to continue broadcasting Instant Traffic and Weather Information.

Thanks,  
David
